The great technical conference FOSDEM resumed physical activity after two years of purely online events. I had the pleasure to make a small talk at the DNS devroom <<https://fosdem.org/2023/schedule/track/dns/>> about the Drink dynamic authoritative DNS server <<https://www.bortzmeyer.org/drink.html>>.

The slides are available on the official site <https://fosdem.org/2023/schedule/event/dns_implementation_of_the_drink_server/>. The recorded video is available at the same place, as well as links to the source code, etc.
